SUMMARY

Software Engineer with 4 years of experience building scalable, high-performance applications using Python, Django, React, Angular, Node.js, and GraphQL and driving cross-team collaboration to deliver high-impact software solutions.

PROFESSIONAL EXPERIENCE

Software Engineer | TriNet — Atlanta, GA, USA 08/2023 – Current

- Engineered a scalable payroll platform with Python, Django, and React, supporting 1,858 SMB clients.
- Built a gRPC facade and versioned Protobuf contracts, standardizing communication across distributed microservices.
- Established observability with OpenTelemetry, Sentry, and Grafana Tempo, reducing incident resolution time by 35%.
- Orchestrated Kafka producers, consumers, and topics, enabling resilient event-driven payroll communication.
- Developed GraphQL APIs that streamlined payroll data retrieval and reduced redundant service requests.
- Orchestrated LLM and tool-calling workflows with Temporal, enabling durable execution, retries, and failure recovery.
- Deployed containerized microservices on Amazon EKS with autoscaling, health checks, and OpenSearch logging.
- Used GitHub Copilot, Claude Code, and other GenAI tools for unit testing, defect resolution, and overall code quality.

Software Engineer | Dattasut Associates — Aurangabad, MH, India 03/2020 – 12/2020

- Built a project management platform with Angular and Node.js, streamlining tracking and stakeholder communication.
- Secured REST APIs using JWT authentication, input validation, and granular role-based access controls.
- Modularized Angular components and shared services, simplifying maintenance and accelerating feature delivery.
- Modeled PostgreSQL schemas and indexes, improving application responsiveness and overall data retrieval.
- Automated builds and deployments with Docker and CI/CD pipelines, enabling faster, more consistent releases.

Associate Software Engineer | Xoriant Solutions — Pune, MH, India 07/2019 - 02/2020

- Designed an Angular workforce management portal for timesheets, task tracking, and administrative reporting.
- Implemented Node.js and Express APIs with MongoDB, supporting scalable workforce data management and reporting.
- Refactored database queries and server-side logic, reducing application response times by 28%.
- Created interactive D3.js dashboards, transforming workforce data into actionable business insights.
- Expanded unit and integration test coverage, reducing regressions and strengthening overall release reliability.
- Delivered production features in Agile sprints, resolving defects and improving overall application stability.

EDUCATION

Master of Sciences in Computer Science, *California State University, Long Beach* **12/2022**

Bachelor of Engineering in Computer Science, *Dr. Babasaheb Ambedkar Marathwada University, India* **06/2019**

SKILLS

Programming Languages: Python, Java, SQL, Bash/Shell Scripting

Web Development: ReactJS, Angular, Node.js, Express, Javascript, Typescript, HTML, CSS, PHP, Bootstrap

Core: Django, Flask, REST API, SOAP, Microservices, Distributed Systems, TCP/IP, gRPC, HTTP, Docker, Kubernetes

Databases and Cloud: MySQL, GraphQL, PostgreSQL, MongoDB, NoSQL, Redis, AWS, Azure, DataDog, GCP

Machine Learning & Tools: TensorFlow, PyTorch, Scikit-learn, NLP, OCR, OpenCV, Jenkins, GitHub, Terraform, CI/CD

PROJECTS

Retail Market Analysis | *Python, Machine Learning, Pandas, Numpy, Tableau, Streamlit.*

- Engineered CNN and ARIMA forecasting models, achieving 93% accuracy in predicting weekly retail sales trends.
- Launched an interactive Streamlit forecasting with Tableau dashboards, delivering actionable strategic sales insights.

Digitization and analysis of invoices | *Python, Machine Learning, NLP, OCR, Tableau, Git.*

- Created an intelligent invoice extraction and document-search pipeline, achieving 92% overall processing accuracy.
- Applied advanced OCR to extract invoice text and tables, visualizing structured financial insights through Tableau.
